R = Commission Report; Asterisk (*) = Nomenclature Report;
000-000 = inclusive page numbers of symposium/conference

Acetylenic derivatives, stereoselective isomerization of	723	Arsenic and P macrocycles and cages, stereoselective syntheses of	1139
Acyclic polyethers, lithium ion complexation kinetics by	2237	Aryl-substituted TCNQ and quinone derivatives	467
stereoselective strategies, use of 2-(trimethylsilyl)thiazole in	643	Asymmetric catalysis, molecular graphics and catalytic hydrogenations, chiral Ru complexes for C-C bond formation with Ti-carbohydrate complexes	1131
Acyl nitroxides, reactions and reactivity	195	synthesis, camphor as a natural source of chirality in	1135
Aggregation, effect of chain packing on surfactant	47	chiral homoenolate reagents for new methods for	1241
Agricultural interest, synthesis of biologically active compounds of	1333	*Atmospheric chemistry terms, glossary of (Recommendations 1990)	1999
Alkali salts of 1,3,3-trisubstituted propynes, use in syntheses	681	Avermectin research, recent advances in	1405
Alkaloid(s) as defensive and signalling agents among insects	1325	Azulenyl novel π -electronic compounds	2167R
carbazole, synthesis of	1967		507
indole, in human medicine	1299		
synthesis, vicinal tricarbonyl derivatives in	1409		
Alkoxy-carbonylation of hydroxy alkenes promoted by Pd(II)	2035	Baker's yeast mediated synthesis of natural products	1449
Alkyl radical 'clock' rearrangements using nitroxides	213	Battered benzene and twisted ethene	525
Alkylidenecyclopropanes: strained and polar aromatics	541	Bent benzene business: small cyclophanes	373
Allenes, carbopalladation of	1867	Benzene, battered, and twisted ethene rings as parts of rigid rotors, use of	569
Allergic contact dermatitis, molecular recognition in	1251	Benzenoid hydrocarbons, nonaromatic	429
Allylboration reactions, stereocontrol in	1993	Bichromophores, 'exciplex' emissions from	1585
Ambergris-type odorants, studies related to	1377	Bidentate ligands, coordination of π -conjugated	1081
American cockroach pheromone, chemistry of	1307	Biological activity, human chorionic gonadotropin (hCG) for expression of	1427
Amine selective coloration with chromoceraands	493	interest, enantiomerically pure compounds of	1293
Amorphous silicon alloys, deposition of	1681	systems, use of nitroxides in	235
*Analytical chemistry, nomenclature for sampling in (Recommendations 1990)	1193R	Biologically active compounds from marine organisms	1393
methods, harmonized protocols for adoption of standardized	149R	compounds of agricultural interest	1333
Antiamoebins, fungal polypeptides	1417	natural products	1277
Antibiotics, eyediyne antitumor, new methods toward	2007	interesting compounds, enantioselective routes to	1209
Antibody-mediated metallo-porphyrin chemistry	2013	Biomimetic catalysts for selective oxidation in organic chemistry	741
Anticancer drugs, quest for a predictive design of	289	polycyclization process that leads to	
Antimalarial drugs, new quinoline derivatives	1303	Daphniphyllum alkaloids	1911
Antitumor antibiotics, eyediyne	2007	Biotechnology, interrelations of chemistry and	753R, 769R
Antiviral vaccines, towards synthetic	1433	Biotransformation: a useful tool in organic chemistry	753R
Arca, effects of chemical reactions in	1675	Blood coagulation proteins, use of spin labels in	247
Arene-alkene cycloadditions and organic synthesis chemistry of the 3d transition metals	1597	Bond-orders, NMR studies of	463
Aroma constituents, tobacco isoprenoids-precursors of important	1169	Boranes in natural product synthesis	1397
Aromatic, are novel main group-element cyclic molecules aromatic?	383	Borepins and group 15 element heteroles	513
compounds, classical, a modern aspect	417	Brassinosteroids, synthesis of	1319
compounds, novel, 8th Intl. Symp., Toyonaka, Osaka, Aug. 1989	373-574		
hydrocarbons, polycyclic, how do they approach infinity?	445	Calculation of NMR chemical shifts of inorganic compounds	1087
structure-enthalpy relationships in polycyclic cata-condensed	435	Calibration of fast alkyl radical 'clock' rearrangements using nitroxides	213
iron sandwiches, application to organic and organometallic synthesis	1165	Celastrols: paradoxes and paradigms in molecular baskets	485
metallation strategy, regioselective synthetic processes based on	671	Calorimetry, solution, at high temperatures and pressures	2115
molecules, new strained and chiral	505	CAMEO program for prediction of products of organic reactions	1921
natural product synthesis	575	Camphor as a natural source of chirality in asymmetric synthesis	1241
quinoid systems, principles and applications	395	Carbazole alkaloids, synthesis of	1967
species from cyclic arrays of hypervalent main-group elements	547	Carbenes, carbides and carbon: ten years of transition metal-acetylene chemistry	1021
Aromaticities and reactivities based on energy partitioning	451	Carbohydrate residues in human chorionic gonadotropin (hCG)	1427
Aromatics, strained and polar	541	Carbonyl addition reactions promoted by Ce reagents	747
